

Casting Call: English or Spanish Speaking K-2 families for short Math and ELA learning videos

I'm working with Terrebonne Productions and PowerMyLearning.org to produce an exciting new series of short learning game videos to help children from K to second grade learn Math and English Language Arts (ELA) basics.

The videos will be 2-3 minutes in length and will be in both Spanish and English. We are looking to work with families with children in K, first or second grade who can be videoed demonstrating/playing these learning games. Each game will be enacted by the student and a caregiver (parent, relative, etc.). Families will be compensated between \$50 to \$200 per video shoot depending on how many learning games are recorded that appointment. We are looking for a variety of ethnically diverse families - African-American, Hispanic, Asian, white, East Indian, and more. Families can be English speaking, Spanish speaking or bi-lingual English/Spanish. We will be doing the production between now and June, 2022.

If you are interested in being involved in helping us create these K-2 learning aids, please contact:
